TABLE OF CONTENTS

VOLUME 27 1925

PAGE

CARPENTER, A. F., of Seattle, Wash. Cone cubic configurations of a ruled surface 397

CASTELLANI, M., of Bryn Mawr, Pa. Algebraic surfaces with reducible bitangent and osculating hyperplanar sections 279

CHURCH, A., of Princeton, N. J. On irredundant sets of postulates . 318

DOUGLAS, J., of New York, N. Y. A criterion for the conformal equivalence of a Riemann space to a euclidean space 299

EIESLAND, J., of Morgantown, W. Va. The group of motions of an Einstein space 213

EISENHART, L. P., of Princeton, N. J. Fields of parallel vectors in a Riemannian geometry 563

EMCH, A., of Urbana, Ill. On the Weddle surface and analogous loci 270

FORD, L. R., of Houston, Tex. On the closeness of approach of complex rational fractions to a complex irrational number 146

FRANKLIN, P., of Cambridge, Mass. Analytic transformations of everywhere dense point sets 91

GRONWALL, T. H., of New York, N. Y. The mutual inductance of two square coils 516

HEDRICK, E. R., of Los Angeles, Calif., and INGOLD, L., of Columbia, Mo. Analytic functions in three dimensions 551

——. The Beltrami equations in three dimensions 556

HOTELLING, H., of Stanford University, Calif. Three-dimensional manifolds of states of motion 329

HUBER, C. M., of Urbana, Ill. On the prime divisors of the cyclotomic functions 43

HUTCHINSON, J. I., of Ithaca, N. Y. On the roots of the Riemann zeta function 49

INGOLD, L., of Columbia, Mo. A symbolic treatment of the geometry of hyperspace 574

——. See HEDRICK, E. R.

INGRAHAM, M. H., of Chicago, Ill. A general theory of linear sets . 163

KASNER, E., of New York, N. Y. An algebraic solution of the Einstein equations 101

——. Solutions of the Einstein equations involving functions of only one variable 155

611916

PAGE

KEMPNER, A. J., of Urbana, Ill. Polynomials of several variables and their residue systems 287
LIBMAN, E. E., of Urbana, Ill. The linear complex of conics . . . 265
LOGSDON, M. I., of Chicago, Ill. Complete groups of points on a plane cubic curve 474
MARCH, H. W., of Madison, Wis. The deflection of a rectangular plate fixed at the edges 307
MILLER, G. A., of Urbana, Ill. The subgroup composed of the substitutions which omit a letter of a transitive group 137
MOORE, R. L., of Austin, Tex. Concerning upper semi-continuous collections of continua 416
MORSE, M., of Ithaca, N. Y. Relations between the critical points of a real function of n independent variables 345
OLSON, H. L., of Chicago, Ill. Congruences with constant absolute invariants 15
OSGOOD, W. F., of Cambridge, Mass. On normal forms of differential equations 1
RAINICH, G. Y., of Baltimore, Md. Electrodynamics in the general relativity theory 106
RIETZ, H. L., of Iowa City, Iowa. On the representation of a certain fundamental law of probability 197
RITT, J. F., of New York, N.Y. Elementary functions and their inverses 68
SCHOUTEN, J. A., of Delft, Holland. On the conditions of integrability of covariant differential equations 441
SHOHAT, J. A., of Chicago, Ill. On the development of continuous functions in series of Techbycheff polynomials. 537
SMITH, H. L., of Chicago, Ill. On the existence of the Stieltjes integral 491
SYNGE, J. L., of Toronto, Canada. A generalization of the Riemannian line-element 61
TAYLOR, J. H., of Chicago, Ill. A generalization of Levi-Civita's parallelism and the Frenet formulas 246
WILSON, A. W., of New Haven, Conn. On the oscillation of a continuum at a point 429
Errata, volume 26 600
